## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-82, drawn to a scanner for capturing 3-D information of an object, classified in class 382, subclass 128.
  - II. Claims 83-88, drawn to a scanner for in-vivo scanning the oral cavity, the scanner comprising: a heated mirror directing light wherein the heating of said mirror prevents fogging during scanning, classified in class 433, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a heated mirror directing light wherein the heating of said mirror prevents fogging during scanning. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
